# **Distinctive Characteristics**

Carefully designed light diffusion and filtering system produces bright, full surface illumination with front panel relamping.

Spot illumination available in single and bicolor LEDs.

Choice of super bright LEDs in white, green, and blue in addition to standard or bright red, amber, and green LEDs.

Stainless steel clips provide secure mounting with a wide range of panel thicknesses.

Latchdown feature gives indication of circuit status. Audible and tactile feedback with smooth and responsive operation.

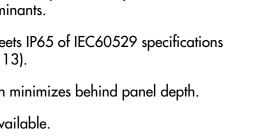

Snap-action contact mechanism gives long electrical life and sensitivity of actuation.

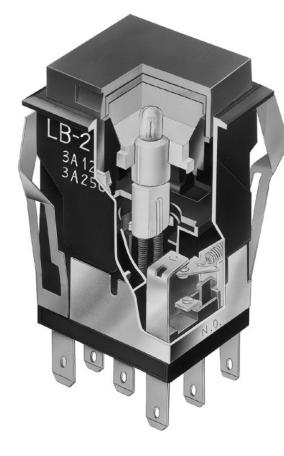

Combination solder lug and .110" quick connect terminals are epoxy sealed to prevent entry of flux, dust, and other contaminants.

Panel sealed model meets IP65 of IEC60529 specifications (similar to NEMA 4 & 13).

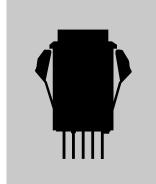

Compact switch design minimizes behind panel depth.

Matching indicators available.

# Incandescent & Neon Lamps

Align projections on lamp with grooves (B) in holder when inserting lamp. To correctly join the lamp holder and cap base, match the cut corners (A).

# AT607 & AT607N

## **Panel Seal Models** For panel seal models,

Bright LED must first be inserted into the lamp socket which is built into the switch. The cap can then be placed on the switch.

## **Snap-in Models**

**ASSEMBLY INSTRUCTIONS** 

Lamp Installation & LED Orientation

Bright LED AT627

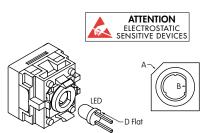

For snap-in models, Bright LED must be inserted into the cap first. Align cut corners (C) when

inserting the LED.
